PERSONAL PROFILE

I am a third-year Computer Science student with a strong interest in software engineering and full-stack development. Building practical applications, learning new technologies, and turning ideas into working solutions. I am eager to gain hands-on experience in a real-world development environment.

EDUCATION

Bachelor's Degree in Computer Science — **2024 - Present**
Software Engineering
Cambodia Academy of Digital Technology

EXPERIENCE

KOMPLEX – School Project — **Aug 2025 - Present**
FullStack Web Developer

- Built lesson-based frontend interfaces with Next.js for interactive, responsive student pages.
- Implemented authentication system using Firebase, Redis, and email services for secure login and registration
- Built a digital library using Express.js, PostgreSQL, and Cloudflare R2

Uni-Finder - School Project — **Dec 2025 - Jan 2026**
Frontend Developer

- Built modular frontend UI with Flutter and Dart for interactive student experience.
- Integrated major-matching questionnaire to help students find suitable majors.
- Integrated Dream exploration features for students to explore

Grand Cineplex - School Project — **June 2025 - July 2025**
FullStack developer

- Built customer frontend UI with React and Tailwind CSS for interactive user experience.
- Developed backend with Express.js and PostgreSQL to handle high-concurrency movie data and theater availability
- Sourced real-time movie data from cinema platforms.

Next-Gen Engagement Program — **Aug 2025 - Sep 2025**
Web design trainer

- Trained CADT freshmen in web design fundamentals including HTML, CSS, and JavaScript
- Guided hands-on practice and small web design projects
- Boosted student's confidence for the upcoming academic year.

ARCHIVEMENT

Innovative Tech Challenge Season3 - Finalist — **Nov 2025 - Jan 2026**
Participant member of Komplex competition

Next-Gen Engagement Program- 2nd Prize — **Aug 2025 - Sep 2025**
Participant member of Komplex competition
